

## Roka Powder WP

### Waterproofing Agent for Concrete and Plaster

Roka Powder WP is calcium stearate dispersion which functions as a water protective additive to cement based construction forms.

#### Uses & Advantages:

- Readily dispersible in concrete and mortar mixes.
- Provides protection from corrosion.
- Provides protection from frost damage.

#### Fields of Application:

Roka Powder WP is designed to provide resistance to water penetration to building structures such as concrete blocks and masonry walls.

#### Technical Information:

Color	White
Consistency	Powder
Density	800 kg/m <sup>3</sup>
Solid Content	100%

Shaheed Road, Lahore Cantt, Pakistan

Viscosity	< 0.8 cps
pH	8.5
Free Alkali	Nil
Dosage	1 – 2 kg per 50 kg bag of cement
Packaging	10 kg bag into 1 kg packaging

### Direction for Use:

Roka Powder WP is readily dispersible in concrete and mortar mixes assuring a uniform distribution for optimum protection.

### Important Note:

The information provided in this data sheet is based on ongoing development efforts and extensive field experience. While we strive to ensure the accuracy and reliability of the information, we cannot assume responsibility for any work performed using our materials, as we have no control over application methods, site conditions, and other factors. Due to ongoing research and development in our laboratories, we recommend that customers verify that this data sheet has not been replaced by a more recent publication.

All products are sold under our standard conditions of sale, which are available upon request. Any field services offered do not imply supervisory responsibility. For further information, please contact your local representative of Roka Chem Solutions.
